Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This is the forth office action for Application 10/633,295. This application remains 43 claims numbered 1-43. Claims 3, 5-11, 13-26 and 28-43 have been withdrawn.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's previous amendment submission filed on 08/22/05, which has been entered.

Information Disclosure Statement

3. Receipt is acknowledged of Form PTO-1449, Information Disclosure Statement, filed 09/16/05, which has been reviewed by examiner.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "separation component" as claimed in claim 1 must be shown or the feature canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate

prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-2, 4, 12 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent no. 6,195,811 to Dragovic.

Dragovic discloses a bracket comprising a first portion (21) capable of supporting a product; a second portion (23) wherein a second portion includes a separation component (27, 31) configured to separate the second portion from a support structure by a predefined amount, wherein the separation component is not located along an entire length of a boundary edge, and wherein the predefined amount

Art Unit: 3632

is based on an adhesive that is applied between the second portion and the support structure; the separation component includes a plurality of dimples (see Fig. 6) and the bracket can be either formed by one of molding or extruding (see also Col. 2, 25-29).

Claims 1-2 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 4,566,924 to Hara et al.

Hara et al. discloses a fixation of a stud on a work piece (Figs. 4-8 for example) comprising a first portion (2) capable of supporting a product; a second portion (3) wherein a second portion includes a separation component (gap inside 7) configured to separate the second portion from a support structure (5) by a predefined amount, wherein the separation component is not located along an entire length of a boundary edge, and wherein the predefined amount based on an adhesive (4) that is applied between the second portion and the support structure; and the bracket can be either formed by one of molding or extruding.

Response to Arguments

6. Applicant's arguments filed 8/22/05 have been fully considered but they are not persuasive.

Applicant's has further amended claim1 to include the term "located", in particular claim 1 now defines the separation component as being not located along an entire length of a boundary edge. However, claim 1 and along with other claims still stand reject based on Dragovic and Hara et al. Examiner respectfully contends that Dragovic and Hara et al each clearly teaches all the limitations as claimed. The separation

Art Unit: 3632

component of Dragovic and Hara et al as indicated is not located along an entire length of a boundary edge as evidently shown on Fig. 2 of Dragovic and/or Figs. 4-8 of Hara et al for example. Examiner respectfully contends that Dragovic and Hara et al each clearly teaches all the limitations as claimed as pointed out in the rejections. The rejections as being anticipated by Dragovic and Hara et al. are therefore still maintained.

Conclusion

This action is made NON-FINAL.
